Course Code: EEE-400

Project Report On

"Web Based Industry Monitoring System"

21th, April, 2018

Department of Electrical and Electronic Engineering

Premier University, Chittagong

Chittagong-4203, Bangladesh

Premier University
Chittagong, Bangladesh

Department of Electrical and Electronic Engineering

Name of Project

Web Based Industry Monitoring System

Project Assigned to:

Name: Forman Ali
ID: 1301411200605

……..
Signature of student

Name: Sajib Dey
ID: 1301411200610

……..
Signature of student

Supervised by:
Mr. Saifuddin Munna
Lecturer, Department of EEE
Premier University, Chittagong.

…….
Signature of Supervisor

Department of Electrical and Electronic Engineering
Premier University, Chittagong
Chittagong-4203, Bangladesh

The thesis and project titled **"Web Based Industry Monitoring System"** submitted by **Forman Ali; Student ID: 1301411200605, Session: January 2014** and **Sajib Dey; Student ID: 1301411200610, Session: January 2014**, is for fulfillment of the requirements of the degree of Bachelor of Science in Electrical and Electronic Engineering.

Declaration

This is to endorse that the work presented through this project entitled "**Web Based Industry Monitoring System**" is the outcome of the study and investigation carried out by us under the supervision of **Mr. Saifuddin Munna**, Lecturer, Department of Electrical and Electronic Engineering (EEE), Premier University, Chittagong. It is also proclaimed that neither of the particular work nor any part of the work presented here has been submitted elsewhere for the award of any degree or diploma.

Supervised by:
Mr. Saifuddin Munna
Lecturer, Dept. of EEE
Premier University

Dedicated to

Our Beloved Parents

&

Our Honorable Teacher

Late Professor Anil Kanti Dhar Sir

Acknowledgements

Our heartfelt thanks and deepest gratitude to our respected thesis and project supervisor **Mr. Saifuddin Munna sir, Lecturer**, Department of Electrical and Electronics Engineering (EEE), Premier University, Chittagong; for having faith in us and for engaging us in this research work. We are also thankful for his valuable guidance through this project work. He has always stretched his helping hands whenever we needed. This thesis, what it is today, is the result of his constant guidance, helpful suggestion, and constructive criticisms and also his endless patience. He is the light bearer of this whole research work. It was truly an honor to be able to work under his supervision.

Furthermore, we would like to thank our honorable Chairman, Department of Electrical and Engineering and also to our faculty members for their constant supports. We would also like to thank our lab assistants. We would also like to think our well-wishers and all the responded who directly and indirectly supported us during our project work with their endless help and support. And last but not the least, we think our classmates for their endless help and support.

Finally, our deepest and sincerest gratitude to our family for their continuous and unparalleled love, help and support.

Abstract

This work proposed a web based industry monitoring system which is a system that allows us to easily monitoring all the mechanisms in the industry. Such as- temperature and humidity, air quality, the amount of gas, heat and the number of products count and their weight can monitoring very easily. We can be monitored it from form any location to the website created by Wi-Fi module. So that person who monitoring it can all industry function in a website. In past we could observe the data in an industry only in computer. But in our work we can observe the data in computer and mobile also by using wifi module.
